transportation Leave a Trail

Barkow's all-welded aluminum or stainless steel glazing trailer is designed to carry glass and frames to the jobsite. It has a gross vehicle weight rating of 9,900.

The exterior glass racks are 144 by 96 inches with ten Stake-Loc stakes and eight-inch useable ledgeboards on each side. The 144-inch interior deck holds frames.

Other features include: "B" loadholding slats throughout, electric brakes on both axles, vertical interior walls and removable wheel covers. The trailer is custom manufactured and available in 10-foot to 16-foot lengths.

Slide Out

Unruh Fab's new van chassis bodies come 12 feet in length with six-inch ledgeboards. These 96-inch-tall outside racks also include Unruh's stake

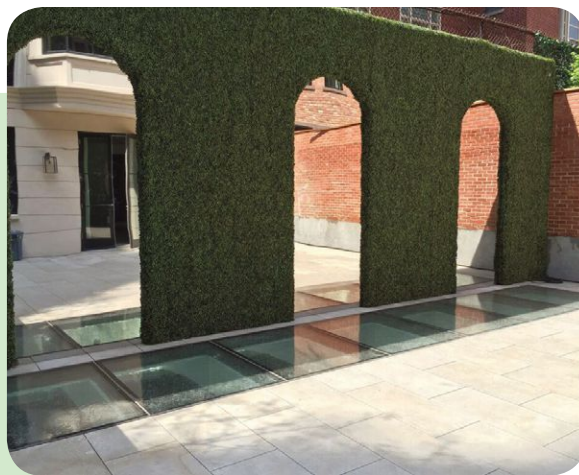

floor systems Walk it Off

Glass Flooring Systems' walkable skylights, called SkyFloor, can be used in a pedestal paver application. The system features thermally broken frames, fully independent structural framing and extruded aluminum structural rafters. Standard and custom sizes are available for the system, which can include various anti-slip tested surfaces and integrated LED lighting.

The stepped design frame transfers the load of the structural floor glazing off the insulating glass unit.

guides and are available with the Unruh Clamp.

The bodies feature tool boxes that slide out without taking any glass storage space. These locking tool boxes pull out the rear of the body, protect tools from the elements and help with organization, according to the company. The toolboxes are available across the Unruh Fab body product line.

Weight of the World

MyGlassTruck.com offers a version of its Atlas truck body for single rear wheel pick-ups with a cab-to-axle between 56 inches and 60 inches. It features a galvanized steel frame, exterior racks with five-inch usable ledges and interior racks for added capacity. Available in nine-foot and ten-foot lengths, the Atlas has a gross vehicle weight rating of less than 10,000 pounds and can be installed by MyGlassTruck or shipped for self-installation.

doors Get Rated

The hurricane-resistant K2 Summit Door by Aldora Aluminum and Glass Products is now ADA compliant and has a water rating. The product has been impact tested to Miami-Dade protocol and is awaiting an NOA and Florida Building Code approval, according to the company.

It comes in maximum sizes of 4-by-10-foot singles or 8-by-10-foot pairs.

In its ADA-compliant, water-rated configuration, the K2 Summit can achieve ratings of 60 pounds per square foot and nine pounds of water without unsightly ramps required. A step-up threshold is also available, as well as multiple panic options including Regent, Adams Rite, Sargent and Von Duprin. Other options offered are a 3/4-inch sub frame, 9/16-inch or 1 5/16-inch glazing, a continuous gear hinge and a ten-inch bottom rail.
